Retail Sales Executive Dashboard - Power BI

📊 Live Dashboard Preview

Dashboard Screenshot

Business Problem

A UK-based online retail company needed to understand £8.91M in sales across 38 countries. Management had no clear view of seasonality, geographic dependency, and top-performing products.

What I Built

An Executive Overview dashboard that answers 4 key business questions in one view.

KPIs Tracked:

- Total Sales: £8.91M
- Total Orders: 19K
- Total Customers: 4K
- AOV: £480.87

Key Insights Found

1. **High Geographic Risk:** 82% of revenue comes from UK alone - business is highly concentrated
2. **Strong Seasonality:** Q4 (Oct-Nov) drives ~45% of annual revenue - November 2011 was highest month (1.16M)
3. **Top Product:** PAPER CRAFT, LITTLE BIRDIE drives highest revenue, followed by REGENCY CAKESTAND
4. **Customer Trend:** Daily sales highly volatile, with major spikes in early Dec 2011

Tools Used

- Power BI Desktop (Maps, Filled Maps, Conditional Formatting with Gradient)
- DAX for measures: Total Sales, Total Orders, AOV
- Power Query for cleaning Country field and data modeling
- Data Storytelling & Dashboard UX Design

Files in this Repo

- `Retail_Sales_Dashboard.pbix` - Power BI source file
- `screenshots/dashboard.png` - Final dashboard image
- `data/sample_data.csv` - Sample 100 rows (full dataset not included for privacy)

How to View

1. Download the .pbix file
2. Open with Power BI Desktop
3. Interact with filters and maps
